

Augmented and immersive Reality for Improved Education in Schools in Europe

ARIES

*Erasmus+ Cooperation partnerships in school education
2023-1-IT02-KA220-SCH-000159590*

26.10.2023

Last October 1, 2023, the ARIES project as just started and we are happy that our first online meeting has already been held.

Today, in this first kick off meeting the aim and the objectives of the project have been discussed to all six partners (from Italy, Greece, Germany, Lithuania). Moreover, we plan in detail the activities to be carried out.

Specifically, the ARIES project - Augmented and Immersive Reality for Improved Education in Schools in Europe – aims to develop and disseminate flexible, simple and low-cost learning modules for secondary school teachers. Thanks to this project, teachers should earn new skills and new competences to master the use of tools based on Augmented and Immersive Reality technologies during their teaching activities. By doing this, creation of engaging curricula and learning activities will be an important outcome. Furthermore, within ARIES, innovative teaching approaches and open-source A&IR learning technology solutions will be promoted to be shared among the partners, with the aim of creating a set of good practices that can be replicated everywhere.

Below is the agenda of the meeting:

14:00 – 14:10 Welcome greetings to the meeting participants;
14:10 - 14:30 Introduction to the ARIES project: context, goals, target groups, results, intellectual outputs, implementation;
14:30 - 15:00 Presentation of Partners (5 minutes per partner);
15:00 – 15:20 Project Management, Administrative and financial issues -Monitoring plan – WP1;
15:20 – 15:40 Work Package and Actions Overview;
15:40 – 16:00 Activities to carry out for WP2 - Stocktaking on Innovative learning formats and Competence framework;
16:00 – 16:30 Open discussion Q/A support;

Next online monthly meeting was scheduled on 22th November - 14:30 - 16:00
